

## 2021 Shoreline Plants Offered

Naturalizing a shoreline can have many practical and environmental benefits:

- Reduces water run-off that causes algae blooms and excessive weed growth;
- Significantly reduces shoreline erosion and makes your shoreline more resilient;
- Much cheaper and more eco-friendly than rock-based “rip rap” shorelines;
- Discourages geese;
- Invites more wildlife to your backyard paradise;
- Leaves less lawn to mow and more time to relax and enjoy the view.

Most plants come in a 1 gallon pot. Some sugar maples will be in a 2 gallon pot.

Consult the RVCA’s website for more about each plant’s requirements.
